**MSc Marketing
University of Exeter
Year 2025**

Word count (from Introduction to Conclusion, excluding tables and figures and their captions; also excluding in-text citations and headings and sub-headings): 2746

Executive Summary

This report proposes a marketing strategy for Nicola's Chocolate, a micro-batch, ethically sourced chocolate brand based in Exeter, Devon. The campaign aims to significantly grow the business by leveraging Nicola's core strengths: ethical sourcing, community engagement, and founder-led storytelling.

The proposed £20,000 budget marks a major increase from previous marketing spend and is justified by the campaign's objectives: to expand brand reach, increase customer engagement, and grow revenue fourfold. The SOSTAC framework structures the report, while the RACE model guides the campaign's tactical delivery:

- **Reach:** Use micro-influencer partnerships, visual storytelling, and community-led content on Instagram, TikTok, and Facebook to expand awareness beyond Devon.
- **Act:** Optimise the website with new landing pages, interactive CTAs, and embedded videos to drive user exploration and email sign-ups.
- **Convert:** Introduce first-time purchase incentives and seasonal gifting bundles, alongside streamlined checkout UX to improve conversion rates.
- **Engage:** Build brand loyalty through *The Chocolate Table* (a new digital community forum) and support with user-generated content, in-person events, and email flows.

The campaign positions Nicola's Chocolate for sustainable long-term growth, laying the foundation for future product development, retail expansion, and cross-brand ethical partnerships.

1. Introduction

This report outlines a structured marketing campaign for Nicola's Chocolate, a small, artisan bean-to-bar brand based in Exeter, Devon. Known for its ethical sourcing and micro-batch production, the business is well-positioned to capitalise on growing consumer interest in craft chocolate. The campaign responds directly to the client brief and proposes a strategy that builds on Nicola's core strengths, particularly community building, storytelling, and product transparency, to expand reach across the Southwest and drive significant revenue growth. The strategy uses SOSTAC and RACE to guide content creation, website improvements, and engagement. This strategy aims to position Nicola's as the leading ethical chocolate brand in the region

2. Situation Analysis

2.1 Macro Analysis

PESTEL	General Impact	Opportunity/Threat
P = Political Trade agreement changes. UK used to import their cocoa ingredients from the EU. With France contributing 30% of UK's cocoa imports in 2020. (CBI Ministry of Foreign Affairs, 2021) In the US, new tariffs introduced by the Trump administration have been favourable for the UK chocolate market. (Sandle, 2025). UK Government is also banning junk food ads on TV as of October 2025 (GOV.UK, 2024).	Companies like Nicola's Chocolate that sourced directly from origins may be better off. However, mostly, Brexit will not have much of an impact on the cocoa business in the UK. The US tariffs will give UK products a competitive advantage over other foreign chocolate in the US market. The UK Government is especially trying to tackle childhood obesity. This isn't a major problem for Nicola because her target audience are older generations.	+1 Opportunity
E = Economic The confectionary market in the UK is valued at £16.18 billion in 2024 and is estimated to grow to £22.06 billion by 2030. Chocolate confectionary makes up 72% market share (GourmetPro, 2024).	Nicola's chocolate is established in a growing chocolate market. Furthermore, it supports Nicola expansion into other counties outside of the Devon. Growth in real wages offers potential opportunity for	+2 Opportunity

Furthermore, falling inflation has reduced pressure on household financing (Mintel Report, 2025).	premium products with higher pricing like Nicola's Chocolate.	
---	---	--

Table 1 – PESTEL (pt 1.)

Pestel	General Impact	Opportunity/Threat
S = Social Public perception of more sustainable and ethically sourced goods is at an all-time high. Furthermore consumers are more willing to spend money on premium goods that result in higher quality.	This is Nicola's greatest advantage. Premium/artisanal chocolate is now in higher demand than ever. Bean-to-bar chocolate is separating itself from standard supermarket chocolate brands. This positions Nicola's chocolate to compete on value and ethics, rather than price, allowing it to maintain a premium positioning without undercutting mass-market competitors.	+2 Opportunity
T = Technology Due to the rise in bean-to-bar microfactories there has been a rise in demand for more compact and customizable machinery. There has also been a rise in demand for more sustainable machinery that have low carbon emissions and reduced energy usage (The Web Sphere, 2025).	Tech advancements can reduce costs as well as help improve production. Nicola's chocolate prides itself on its sustainability. Thus, technology that reduces carbon emissions will help support Nicola's values.	+1 Opportunity
E = Environment Climate change is causing a serious threat to the cocoa supply chain especially in West Africa (Agence France-Presse, 2025).	Climate can cause small-batch producers to have pushed up costs because of limited cocoa supply.	-2 Threat
L = Legal The Cocoa and Chocolate Products (England) Regulations 2003 mandate minimum cocoa and milk solids content in products and require clear labelling of cocoa percentages and allergens (GOV.UK, 2013).	Nicola's chocolate prides itself in its cocoa percentage. It already highlights the percentage of each of her chocolate bars on the packaging.	+1 Opportunity

Table 2- PESTEL (pt 2.)

2.2 Micro Analysis

Forces	Impact on Nicola's Chocolate
Threat of New Entrants • Moderate capital needed: Machinery needed as well as a cocoa bean supplier. • Distribution barriers: Its difficult to get supermarket deals for greater distribution. New entrants have to rely on direct channels. • Discovery Culture: Chocolate connoisseurs enjoy exploring new makers, origins, and flavours - novelty is part of the experience. Gives small businesses a niche market.	Low-Medium Medium barriers to new entrants especially with distribution. But artisanal bean-to-bar chocolate is favoured by quite an active community.
Threat of Substitutes • Other Confectionary Items: Chocolate while making up most of the confectionary market, at 72% (GourmetPro, 2024). It still must compete against other sweet treats. • Health orientated items: chocolate might also be substituted for more healthy alternatives like a fruit or nut bar. Protein bars are especially become more influential.	Medium While there are plenty of other substitutes in the market. Chocolate itself is the leading confectionary item.
Bargaining Power of Suppliers • Cacao farmers: As the source of the essential raw ingredient, cacao farmers and cooperatives hold significant leverage, especially in the fine flavour market. Without secure and ethical supply agreements, artisanal producers risk losing control over quality, consistency, and pricing. • Cacao shippers: Less of an influence for the bigger chocolate producers. But for small shippers that cannot afford a whole crate direct from farmers they often have to go through a third-party which has a lot of leverage over their stock.	High Nicola's is a small chocolate maker and as such relies heavily on suppliers. She also has to order through a third-party because she currently doesn't operate at a scale where she can buy straight from farmers.

Table 3 – Porter's Five Forces (pt 1.)

Forces	Impact on Nicola's Chocolate
Bargaining Power of Buyers • Consumers have an abundant of choice: the consumers have plentiful choices.	Low Nicola's unique chocolate experience

• Highly price sensitive: It's a mass market; even premium buyers, that the price is less of a variable, value top quality (Specialty Food, 2024).	may attract loyal connoisseurs, but she must continuously deliver quality and innovation to retain them.
Rivalry of Competitors • Other bean-to-bar chocolate makers: In January 2024, there were around 50 bean-to-bar makers in the UK (Specialty Food, 2024). This represents a high level of market saturation. Additionally, the sector includes a wide variety of producers, some positioned as premium brands and others as deeply artisanal, making it increasingly difficult for new entrants to stand out. • Larger chocolate companies: beyond bean-to-bar most chocolate consumers are the mainstream shelf chocolates that can utilise economies of scale to keep their prices lower.	High Nicola's chocolate offers a distinctive experience, but it still aligns closely with the values and aesthetics of many other UK bean-to-bar brands. To stand out in this highly saturated market, she will need a sharper, more differentiated selling point.

Table 4 – Porter's Five Forces (pt 2.)

2.3 Internal Analysis

5M Framework	Details	Insights
Manpower	Nicola's Chocolate very much is a self-run operation with most the manpower conducted by Nicola herself. Although occasionally her children and friends help.	Being a solo operator allows for creative freedom and quality control but limits production capacity and scalability.
Materials	Nicola sources her chocolate through Belco who source from the cocoa farms because her operation is still too small to go straight to the farm. Nicola is still able to get all the information from where her product comes from which helps with her transparent supply chain.	The limitations of sourcing through a third party however is a more limited flexibility and less control over the pricing of her products
Machinery & Facilities	Nicola owns basic chocolate making equipment such as roasters and grinders and moulds that are capable for micro-batches. She now also operates a small brick-and-mortar	Nicola's current operation is very limited and will struggle to function with greater demand. Nicola's new physical location improves her operational capacity and allows for

	shop, which gives her dedicated space for production, storage, and direct-to-consumer sales. Previously, she worked from her home shed, which offered limited working space.	face-to-face customer engagement. However, her equipment is still small-scale, and the shop will need to balance production space with retail function.
Method	Nicola uses a bean-to-bar, micro batch production method. This means they source cocoa beans directly, roast and process them in small batches, allowing for careful control over texture, aroma, and flavour in every batch.	Nicola's micro batch method gives her better control over the quality as she manually oversees all of her chocolate. However it is quite time consuming.
Markets	Nicola's chocolate fits into the "fine" chocolate market. This market has an emphasis on chocolate % and where the chocolate comes from. It also includes a transparent supply chain with ethical sourcing (Gordon, 2021; Shelby Team, 2019).	With a more focused market than the "premium" or "mainstream" chocolate markets it allows Nicola's to shine with a target segment that have the same values as her brand.

Table 5 – 5M Model

2.4 Market Analysis

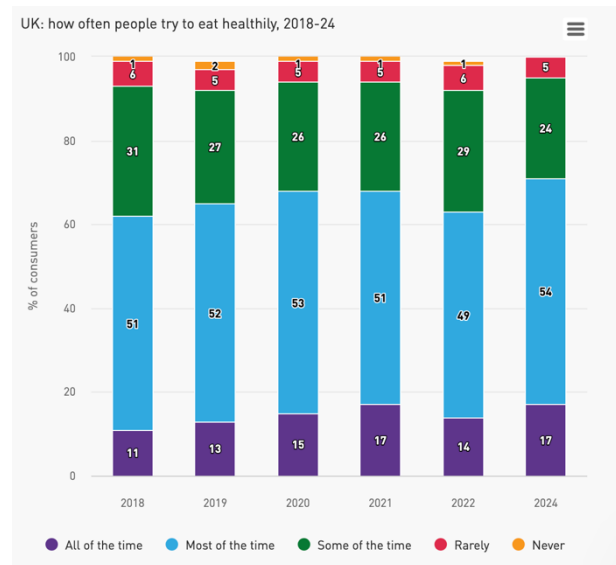

Broad Overview

In the UK, chocolate and sugar confectionery producers earned over £16.18 billion in 2024 (Statista, 2025b). The chocolate market is expected to have an estimated CAGR (2025-2029) of 11.79% (Statista, 2025a). Premium chocolate is also a growing industry within the chocolate market. 59% of chocolate buyers and eaters choose premium brands. With unique flavours proving to be especially impactful in consumer choice, as it helps justify the premium prices. A Mintel report (2025) shows that 77% of people who think premium chocolate provides unique flavours will be willing to spend more money on chocolate.

Consumer Behaviour

Shifting values toward quality and ethical production have elevated small-batch, transparent brands. Consumers now associate authenticity and sustainability with value. (Grand View Research, 2024).

Health is another strong driver. The media's spotlight on ultra-processed foods (UPFs) has impacted mass-produced snacks. Statistics show that 48% of chocolate consumers are concerned about UPFs and have caused them to look more closely into ingredients (Mintel Report, 2025). The graph below is taken from a Mintel report looking at the rise in healthy eating in the UK.

- Graph from Mintel, 2025

Competitor Analysis

Nicola's Chocolate competes in a saturated space: mainstream (e.g., Tony's), luxury (e.g., Hotel Chocolat), and artisanal (e.g., Pump Street). All the competitors shown here are bigger than Nicola but carry interesting points of parity.

Category	Pricing Strategy	Unique Selling Points (USPs)
Mainstream Competitor: Tony's Chocolate	Mid-range; £3.98 for 180g (£2.21 for 100g); priced higher than mass-market brands like Cadbury but accessible	- Ethical sourcing - slave-free cocoa supply chain - bold packaging - Strong Distribution - strong storytelling - chunky bars: do not have even shapes to it like most bars. Despite being mass-market it shares many similar USPs to Nicola's Chocolat such as the ethical sourcing or transparent supply chain.
Luxury Competitor: Hotel Chocolat	Premium pricing; £5.45 for 100g; gift-oriented; often uses bundling and seasonal offers	- British-grown cocoa - in-store experiences - elegant gifting range - innovation in flavours
Artisanal Competitors: Pump Street	High-end artisanal pricing; £7.95 for 70g (£11.36 for 100g); small-batch, bean- to-bar – priced accordingly	- Bakery + chocolate hybrid brand - single-origin transparency - handmade micro-batch products Most similar to Nicola's Chocolate especially in its smaller reach as well as its micro-batch production.

Nicola's Chocolate	High-end artisanal pricing; £5.65 for 50g (£11.30 for 100g);	- Ethical sourcing - Authentic brand image - Handmade micro-batch - Transparency
---------------------------	---	---

Table 6 – Competitor Analysis

When comparing the pricing strategy of competitors, the analysis compares the pricing of standard milk chocolate. The “mainstream” and “luxury” chocolates are considerably cheaper, and Nicola's chocolate proves to be very competitively priced in comparison to other artisanal, bean-to-bar producers. This demonstrates that the artisanal chocolate market has its own pricing strategy to consider.

2.5 SWOT

Strength • Strong central figure: A lot of Nicola's current following follow because of her. • Recent brand redesign: the redesign from Exe to Nicola's allows for a broader appeal outside of Exeter • Strong ethical and honest brand image: This is inline with current consumer trends for more sustainable and transparent goods.	Weakness • Limited production scale: Nicola's chocolate production lacks the capital to grow if demand increases. It also is very time consuming for Nicola as a micro-batch but also the only employee. • Low brand awareness outside of the southwest: Nicola's chocolate is has very low reach outside of the southwest.
Opportunity • Rising demand for artisanal chocolate: the UK chocolate market has a CAGR of 12.8% (Cognitive Market Research, 2023). • Strong community: there is a strong community that is formed around Nicola.	Threat • Intense competition: There are a lot of other bean-to-bar/artisanal chocolate companies. • Climate change: The supply is inconsistent and costs can vary drastically.

Table 7 – SWOT Analysis

2.6 TOWS

Strength-Opportunities (SO) • Nicola's strong personal brand and community: following to lead a nationwide campaign capitalizing on the rising interest in artisanal, ethical chocolate. • Storytelling and value driven messaging: exploit the rise for artisanal chocolate using the strong/ethical brand image to attract more consumers.	Weakness-Opportunities (WO) • UGC: leverage the community to reduce the need for Nicola's involvement in content creation. • Collaborations: Nicola already does this but greater collaborations that reach out of Devon will give her a footing for expansion.
Strength-Threat (ST)	Weakness-Threat (WT) • Increasing production capacity: The limited production will hinder Nicola when dealing with

• Community events: It also builds grassroots loyalty that buffers against more price-competitive competition. • Brand differentiation: Nicola's ethical sourcing and brand redesign put her in a good spot but a further point of differentiation will allow her to separate from the competition.	larger competitors. So outsourcing certain things or hiring an intern will help scale the business.
--	---

Table 8 – TOWS Analysis

3. Objectives

3.1 Marketing Objectives

1. Increase Brand Awareness Nationwide:

Expand awareness beyond Devon by increasing Instagram followers by **120%**, driven by micro-influencer partnerships and ethical, visual storytelling.

Accomplish by: September 2026

Evaluate: Monitor Instagram growth through Meta analytics.

Revise: Adjust influencers or content if growth plateaus

2. Grow and Engage the Nicola's Chocolate Community:

Launch an online community with 1,000 active members and 200 UGC posts.

Accomplish by: September 2026

Evaluate: Monitor community size, post engagement, and UGC contributions monthly.

Revise: If growth is slow, host reward-driven events or cross-promote via collaborators. Seeding comments may help.

3. Improve Website Traffic & Engagement:

Boost organic traffic by 75% and reduce bounce rate by 20% via SEO and value-led content.

Accomplish by: September 2026

Evaluate: Track website metrics quarterly using Google Analytics and SEO tools.

Revise: Identify bounce rate bottlenecks, optimise high-exit pages and CTAs to improve retention

3.2 Financial Objectives

4. Increase Revenue Fourfold

Grow annual revenue from £25,000 to £100,000 by September 2026 through first-time incentives, gifting bundles, repeat purchases, and new stockists.

Accomplish by: September 2026

Evaluate: Monitor monthly sales and quarterly campaign performance.

Revise: Adjust pricing or loyalty incentives if growth stalls

5. Expand Retail Distribution outside of Devon:

Secure 10 new retail stockists across three counties by March 2026 through targeted outreach, shelf-appealing packaging, and Nicola's ethical brand story.

Accomplish by: September 2026

Evaluate: Track retail outreach and reorder rates quarterly.

Revise: If outreach fails, adapt the pitch or use sampling packs. Growth in social following and community may increase credibility over time

4. Strategy

4.1 Ansoff Matrix

Table 9 – Ansoff Matrix

Selecting market penetration is because Nicola's Chocolate is still a small business, and improving reach and engagement is pivotal for brand growth. As a small business with a moderate budget of £20,000, it doesn't have the resources for the other Ansoff strategies. With Nicola's current operational setup, market penetration offers the lowest risk with the highest efficiency. The strategy will aim to improve three objectives:

- Sales
- Website performance
- Community

The community is especially important for a small company as to operate it is low cost but can result in the highest return. A community may also offer free marketing, as those active in a community can hold up a business.

4.2 STP

Segmentation

This campaign uses multi-variable segmentation to target three key groups:

- **Local Ethical Buyers**

Nicola's core audience: people who discovered her at craft fairs or local stockists like Greendale's Farm Shop. They buy into the brand's ethical values and support for local makers. Many knew her pre-rebrand and stayed loyal due to shared values and product quality.

- **Chocolate Connoisseurs**

This niche group is drawn to Nicola’s transparency and flavour quality. Some found her through chocolate-tasting lessons or online searches for artisanal brands. They value craft and are active in ethical food communities.

- **Gift Buyers**

These consumers purchase Nicola’s Chocolate for holidays or special occasions. Less values-driven than the other groups, but more likely to justify premium prices for presentation and uniqueness. Their purchases spike during seasonal moments.

Variable Type	Group 1: Local Ethical Buyers (Devon & Surrounding)	Group 2: Chocolate Connoisseurs	Group 3: Gift buyers
Demographic	Mixed gender, aged 30-60, people who shop at local markets & food events, earning £50k + or retired, premium buyers	Mixed gender, 28–40, urban professionals, mid-high income	25–60, mixed gender, any income
Geographic	Specialised: Exeter Region: Devon Broad: South-West England	Primarily UK, but could be global as chocolate connoisseurs value trying from a wide range as possible (Nicola has received orders from Germany)	Region: Devon Broad: all of UK
Psychographic	Value community, sustainability, ethical, and localism	Seek small-batch craft chocolate, value traceability and variety	Values presentation, flavors & uniqueness
Behavioural	Buy at fairs, food festivals, local retailers; impulse buyers at events	Subscribe to ethical food blogs, shop online for rare brands, willing to pay more for “story”	Shops during holidays, birthdays, less consistent demand

Table 10 – STP

Values, Attitudes and Lifestyles (VALS)

VALS (Values and Lifestyles) is a psychographic segmentation model used to classify consumers based on their motivations and resources (University of Minnesota, n.d.). For Nicola’s Chocolate, the most relevant segments are:

Thinkers: principled, informed, value ethics and quality.

Experiencers: trend-aware, sensory-driven, enjoy discovering niche brands.

Both groups are well-resourced and willing to pay more for authentic, small-batch products, making them ideal targets for a premium, ethical chocolate brand like Nicola’s.

4.3 Targeting

Group 1 is the primary target for this campaign. While they are currently referred to as “local ethical buyers” due to Nicola’s existing customer base being concentrated around Devon, their defining trait is not location, but rather it's a strong alignment with

the brand's values of sustainability, authenticity, and support for independent makers. But in improving our market penetration of Group 1, it will likely also result in better performance with Group 2.

Sector	Objectives Covered	Explanation
Primary: Group 1	1, 2, 4, 5	This group already knows the brand from fairs and local events, making them key for driving community engagement, repeat sales, and local retail growth . Their word-of-mouth and UGC also help build early momentum for online visibility and website engagement .
Secondary: Group 2	2, 3, 4	Connoisseurs are ideal for digital expansion - they engage with ethical brands online, boosting traffic, community growth, and premium DTC sales . They will be essential for the creation of UGC .

Table 11 - Targeting

The campaign will expand Group 1 from local to national by targeting value-driven consumers across the UK who resonate with Nicola's ethics and storytelling. While the reach grows, the brand's intimate, community-led tone will be preserved by providing a platform for the community to interact with each other.

4.4 Personas

My personas reflect the two key groups targeted during this campaign. Persona #1 (Shannon, a values-driven HR Director from Devon) represents the local ethical buyers who will be the primary focus of the campaign through community-building, loyalty schemes, and UGC initiatives. Persona #2 (Samir, a digital connoisseur with a taste for storytelling) reflects Group 2, who will be reached indirectly via national awareness tactics like SEO, influencer content, and Nicola's founder-led storytelling.

Shannon primarily supports **Objectives 1, 2, 4, and 5**, while Samir supports **Objectives 2, 3, and 4**. Together, these personas highlight both the immediate and long-term growth potential for Nicola's Chocolate.

Persona #1 - Shannon Reed

Image is AI generated

Profile

Age: 45

Location: Totnes, Devon

Income: £43,000

Values: Sustainability, handmade, small business support, artisan quality

Biography

Shannon, 42, is a human resources director from Totnes, Devon, who values ethical living, sustainability, and supporting local businesses. She discovered Nicola's Chocolate at a local fair and became a loyal customer, drawn by its handmade feel and ethical story. She shops at farmers' markets and independents like Greendale Farm Shop, often buying gifts and treats that align with her values.

Goals

- Support ethical small businesses, especially women-led ones
- Find gifts that feel thoughtful and beautifully made
- Reduce her environmental impact while still indulging in high-quality treats
- Stay connected to local producers and stories

Pain Points

- Distrusts greenwashing — doesn't want vague "sustainable" claims without details.
- Limited access to niche brands outside of markets — prefers not to order online.
- Overpriced packaging — dislikes paying premium prices where packaging feels overdone or impersonal.

Psychographic Information

- Lifestyle: Shops at local grocers, listens to sustainability podcasts, and attends community fairs
- Personality: Warm, reflective, values-driven, conscientious
- Interests: Ethical shopping, gardening, cooking, supporting local art and food producers

Figure 1 – Persona #1

Persona #2 - Samir Shah

Image is AI generated

Profile

Age: 29

Location: Edinburgh

Income: £55,000

Values: Authenticity, craft, variety, quality, transparency

Biography

Samir is a 29-year-old creative strategist at a digital agency in Edinburgh. He's curious, values originality, and is known among his friends for being the first to discover niche brands from coffee roasters to independent chocolatiers. With a strong interest in food storytelling and artisanal quality, Samir often browses platforms like Instagram and Substack to follow emerging creators.

Goals

- Discover meaningful products and support independent makers
- Share new finds with friends or on Instagram Stories
- Curate a personal collection of favourite UK makers
- Feel aligned with the values behind what he consumes

Pain Points

- Skepticism of mass-market 'ethical' claims, wants proof, not marketing fluff.
- Limited availability, struggles to find genuinely small brands without inflated shipping costs or clunky websites.
- Generic packaging or branding, anything that feels too "corporate" or impersonal is off-putting.

Psychographic Information

- Lifestyle: Active on Instagram and Reddit; visits art shows, farmers' markets, and indie coffee shops
- Personality: Curious, creative, socially conscious, design-literate
- Interests: Food culture, indie publications, digital storytelling, craft spirits, zero-waste brand

Figure 2 – Persona #2

4.5 Positioning

The position statement will use David Jobber's 4Cs to help formulate the structure of the statement.

David Jobber's (2006) 4Cs Framework

C	How Nicola Achieves It
Clarity	Clear messaging: micro-batch, ethical and handmade chocolate
Credibility	Real founder story, visible sourcing, and transparent supply chain resulting in award-winning products.
Consistency	Reinforced across packaging, Instagram, tone of voice, and pop-ups. The product itself is produced solely by Nicola. Despite this the chocolate can be inconsistent but that is one of the USPs of the brand as the result is reliant on the cocoa beans.
Competitiveness	Unique blend of artisanal quality and ethical sourcing in a crowded bean-to-bar segment.

Table 12 – 4 Cs Framework

Positioning Statement:

For ethical chocolate lovers, Nicola’s Chocolate offers handmade, small-batch bars with full transparency and personal storytelling. Led by its founder, the brand stands out for its honesty, community spirit, and flavour that reflects its values.

Perceptual Map

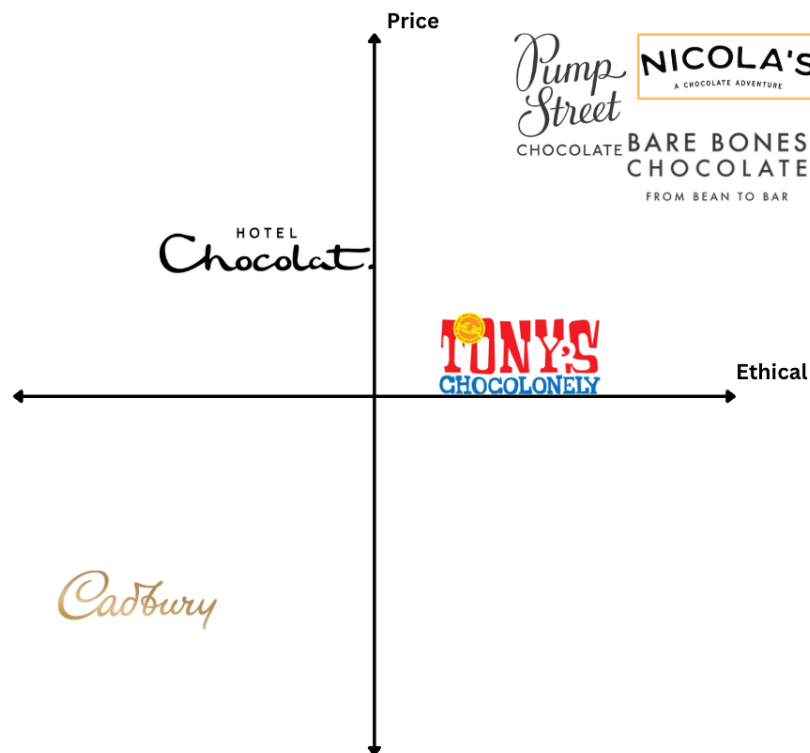

Figure 3 – Perceptual Map

This perceptual map shows that Nicola’s Chocolate shares a competitive space with other artisanal bean-to-bar brands such as Pump Street and Bare Bones, particularly in terms of pricing and ethical emphasis. What sets it apart is Nicola herself; her personal story, values, and transparency serve as key points of differentiation in an otherwise crowded artisanal, bean-to-bar space.

5. Tactics

5.1 Campaign Big Idea and Key Message

Big Idea	The Chocolate Table – A Place to Share, Stay Connected, and Grow Together
Key Message	At Nicola’s Chocolate, we believe great chocolate brings people together. <i>The Chocolate Table</i> is our new community forum — a

	space for customers to share experiences, discover events, connect with Nicola directly, and stay in touch as the brand grows beyond Devon. Rooted in storytelling and ethical values, this platform keeps our community close, no matter the distance.
--	---

Table 13 – Campaign Idea

Justification

One of the USP's that Nicola's Chocolate has that differentiates her from her competition is her strong community.

The motivation for "The Chocolate Table" stems from Fournier and Lee's (2009) discussion on how to get a brand community right. In their discussion, they analyse the Three Forms of Community Affiliation developed by Jump Associates. These are:

- **Pools:** people have strong associations with a shared activity or goal or share values
- **Webs:** People have strong one-to-one relationships with others who have similar or complementary needs; examples include Facebook or Cancer Survivors Network
- **Hubs:** people have strong connections to a central figure and weaker associations with one another

Nicola's current community centres on her. According to Fournier & Lee (2009), founder-led "hub" communities can become fragile without deeper peer-to-peer links. The Chocolate Table transforms the brand into a hybrid of "hub" and "web," where members connect, not just with Nicola.

This shift enhances sustainability, creates free word-of-mouth marketing, and reduces Nicola's long-term content burden, while keeping her authenticity central.

5.2 Marketing Mix (7Ps)

P	Current State	Tactical Implementation
Product	Micro-batch, bean-to-bar chocolate	• The Product will mostly remain the same. • The introduction of limited time flavours that can cause discussion on "The Chocolate Table" • Host an event where members of the community can vote for a flavour to be made.
Price	Premium pricing, in line with other ethical brands	• Maintain the same premium prices; they're competitive with other artisanal brands • Offer rewards for loyalty; doesn't have to be much but maybe one of the 5g mini-chocolate bars on everyone's third order.

Place	Mainly DTC via website but also local stockists, new brick and mortar	• Launch “The Chocolate Table” forum to boost traffic and engagement • Reach out to other farmshops to stock product (such as Powderham farm shop) and even pushing outside of Devon into Cornwall, Somerset and Dorset.
Promotion	Organic Instagram, craft fairs and events	• Use influencer marketing • Emphasis on story telling in content (appeals to group 2) • Show behind the scenes • On the website include photos of the chocolate rather than the packaging • Using both Instagram & TikTok

Table 14 – 4 Ps

People	Nicola, occasional help from family	• Train a moderator/intern to support forum engagement and social. Pay them minimum wage and have them part time. • Outsource website development, creation of the forum • Use consumers as brand advocates through UGC
Process	Handmade, slow batches, small amounts made	• The process remains the same • Micro-batch is the USP and quality assurance • Long-term with the greater demand look for assistance with production
Physical Evidence	Craft packaging, Instagram visuals, brand new chocolate factory shop opening 12 th July 2025	• Improve packaging storytelling (e.g. origin cards inside boxes)

Table 15 – 3 Ps

5.3 Content Strategy

The content strategy for Nicola’s Chocolate is designed to reinforce and highlight Nicola’s core values and USPs

Content Themes	Details
Story Telling	Sharing Nicola’s personal journey, her chocolate-making process, and the brand’s evolution from Exe to Nicola’s Chocolate. This is effective at appealing to group 1.
Product Origin and Craft	Detailed content on bean sourcing, production methods, and limited micro-batch characteristics. Especially effective on Group 2.

Community Engagement	Encouraging UGC (user-generated content), highlighting customer stories, and launching the community forum (“The Chocolate Table”) to give the brand a national but still intimate feel. Nicola will post updates, event news, and respond to comments.
Gifting	More for seasonal periods, i.e. Christmas, Easter, Fathers/Mothers Day. This supports the gifting buyer segment and promotes bundling and repeat purchases. This is likely to suit both Group 1 & 3.

Table 16 – Content Themes

5.4 Channel Breakdown (using RACE)

Reach

This phase aims to increase Nicola’s audience outside of Devon. The main target audience is people who have ethical values (Group 1). It will rely on visually-led storytelling, community voice, and founder presence to introduce new audiences to Nicola’s Chocolate.

Social media

Instagram remains Nicola’s primary platform, but the campaign will also use Facebook to engage older, value-focused consumers. Statistically, Facebook is the most popular social media platform as of February 2025. Furthermore, the age demographic that utilises Facebook heavily mirrors Nicola’s Group 1 audience (Statista, 2024).

Influencer Marketing: During the campaign, we will use micro-influencer people (5-50k followers). The motivations for this are first they will be cheaper, which is better for smaller businesses with lower budgets. Second, they can be equally as effective if you choose correctly. Using a niche influencer whose audience has the same values as your target audience will return better results than a large influencer whose audience will comprise many different types of people.

Sample Influencer:

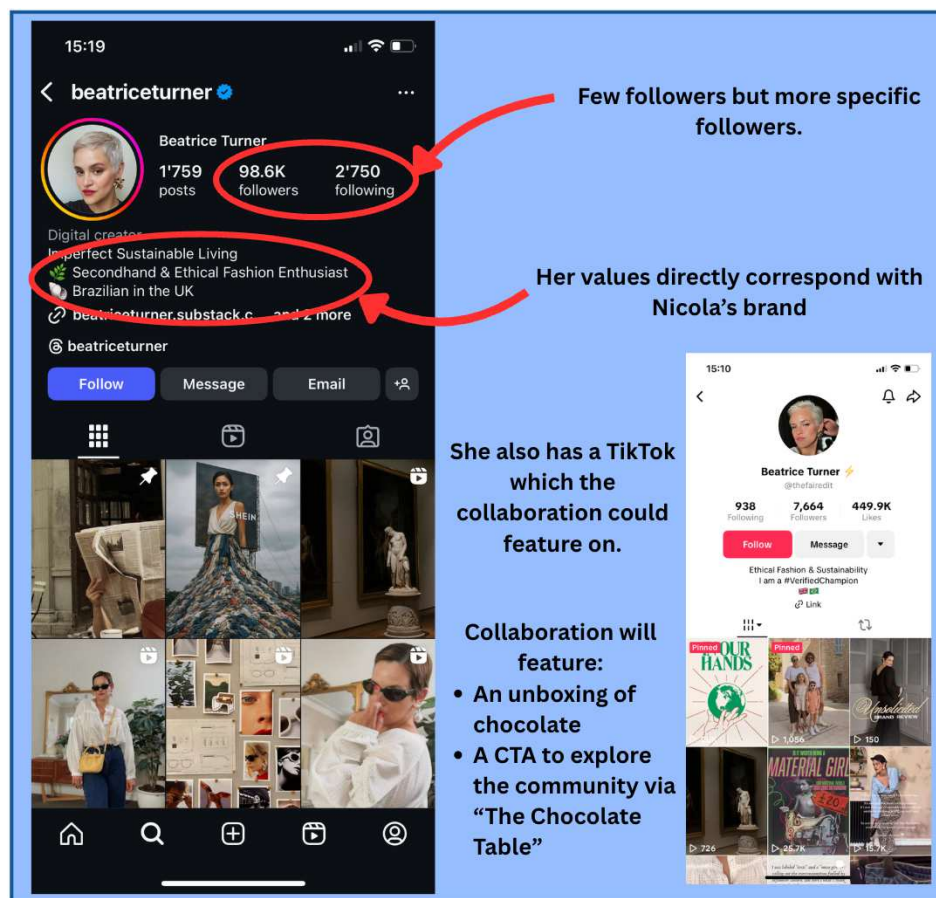

Figure 4 – Sample Influencer

One thing to note about the use of TikTok that is especially strong for reach and could be a reason to utilise that platform is its virality. TikTok's algorithm is very good at sending content to as many people as possible. For Reach, where the goal is to get as much attention as possible, this is valuable.

Sample post:

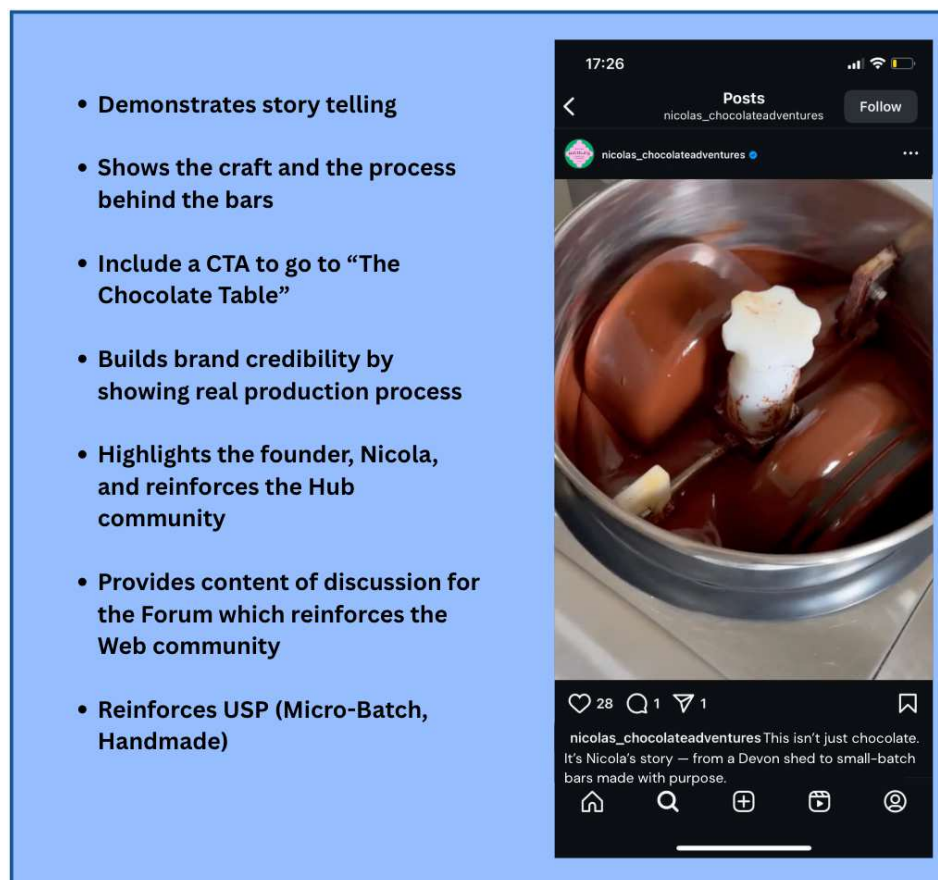

Figure 5 – Sample Post

Key Metrics:

- Impressions
- Visits
- New Users (Google Analytics)
- Click-Through-Rate (CTR)

Pop-ups/Workshops

Craft fairs and events have been key drivers for Nicola's current growth. Events are valuable because consumers can meet Nicola, talk to her, and see her passion for the brand. Furthermore, studies show that synchronous communication is the richest form of communication and more effective in causing sales (Bharadwaj & Shipley, 2020). Furthermore, according to Fournier and Lee (2009), the role of physical spaces is essential in fostering a good community.

Pop-ups and Workshop Ideas

Pop-ups

- Pop-ups at farmers markets, craft fairs, and farmers markets.
- Generates trust
- Creates word of mouth
- Doing events outside of Devon can help extend Reach
- Synchronous communication allows for richer engagement

Workshops

- Nicola already runs successful chocolate workshops - this tactic expands their geographic reach
- Workshops have been a core way the existing community formed, so scaling them supports community-led growth
- Format includes:
 - Tasting sessions to educate on fine chocolate
 - Hands-on “Make Your Own Bar” classes for immersive engagement
- Builds trust and visibility in a format that’s authentic, not commercial

Figure 6 – Pop-ups and Workshop Ideas

Key Metrics:

- Event Footfall
- Sample-To-Purchase Ratio
- Attendance
- UGC (Number of tagged Instagram posts/stories from attendees)

Act

The Act phase focuses on turning interest into interaction. This includes encouraging users to visit the website, explore the brand story, sign up for emails, and be introduced to The Chocolate Table, the campaign’s central community space.

Website Experience & Landing Pages

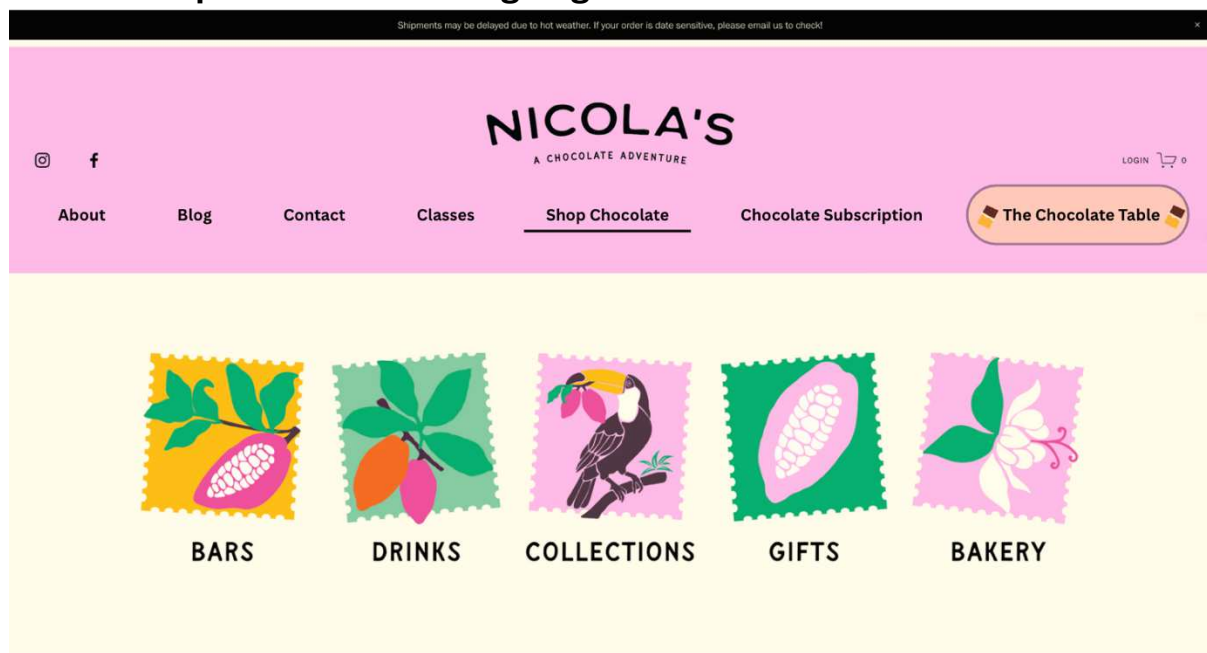

Figure 7 – Improved UX

Section	Proposed Change	Purpose (Act objective)
Navigation Menu	• Add new tab “The Chocolate Table” • Make the navigation tabs bigger and more clear. • Remove wholesale as the website is primarily for DTC	Clear navigation reduces drop-off. “The Chocolate Table” was visually distinguished to highlight its role as a community space. It serves as the campaign’s core CTA, inviting visitors to move from browsing to belonging.
Homepage	• Add homepage subheading: “Join our community of chocolate lovers — handcrafted, ethical, personal.” • Add rotating banner: “New: The Chocolate Table – Share your chocolate story” with CTA	Highlights core values of Nicola’s Chocolate: community and ethical. Builds emotional resonance and encourages click-throughs. The rotating banner prompts users to have interactions beyond shopping.
Product Pages	• Add photos of the chocolate; even a clip of that specific bar type being produced • Add CTA block: “What do you think? Join the discussion on The Chocolate Table”	Showing the product is important for conversion and showing the bar type being produced contributes to the storytelling USP of Nicola’s chocolate. The CTA on the product page drives engagement and directs traffic to the community.

Table 17 – Website Experience

Key Metrics:

- Time on site
- bounce rate
- CTA clicks

Story-Driven Video Content

Short-form video content will be embedded throughout the website and blog. This adds dimension to Nicola's story and makes the browsing experience more interactive and memorable, creating deeper emotional connection.

Where to incorporate videos:

Page	Video Use	Purpose
Homepage	"Meet Nicola" embedded or autoplay muted	Introduces new visitors to Nicola as the cornerstone of the business. This begins their entrance into the community. Builds trust, encourages scroll and explore.
Product pages	Showing how that particular bar is made.	Transparency of the supply chain is already a core principle for Nicola's chocolate. With the location of the beans, her supplier and cocoa percentage being very accessible knowledge. This video incorporation only enhances this transparency by showing the production on her end. This improves transparency, authenticity and engagement.
Blog	Embedded mid-post to support storytelling	Nicola's blog adds warmth and personality to the site, helping it feel more like a personal journey than a standard D2C platform. Embedding short videos within blog posts will further increase engagement; allowing visitors to connect more deeply with Nicola's process, values, and story, while reducing bounce rate and encouraging longer time on page.

Table 18 – Video Content

An investment worth considering is an upgrade in camera and audio equipment. With improved equipment, she could maintain the artisanal tone while enhancing clarity and visual appeal, allowing for more refined, stylised content that still feels authentic. She could add a retro vibe in post-production, which would accomplish this.

Key Metrics:

- Video watch time

- Bounce rate reduction
- Sign-ups after video views
- Scroll depth & engagement rate on pages with video

Convert

During the Convert stage, interest becomes action. For Nicola's Chocolate, this will be the first time purchases or joining "The Chocolate Table". Reducing friction is key for conversion.

First-Time Purchase Incentives

To encourage a first purchase, users will be offered a 10% discount at checkout when they create an account. Once applied, they'll be shown additional product recommendations. Psychologically, customers often perceive the discount as "saved money," which can make them more open to adding another item to their basket.

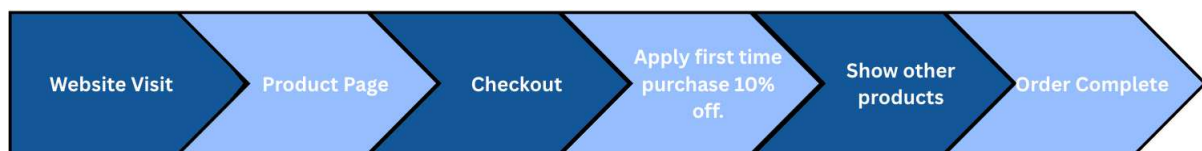

Figure 8 - Purchase Flow

Key Metrics:

- Redemptions
- Code uses
- Checkout completions

The Chocolate Table Sign-Ups

Core concept:

- The Chocolate Table sign-up is a conversion, not just a post-purchase afterthought, hence it needs equal treatment as any other transaction
- Avoid pushing it too hard during the purchase process; the focus should stay on completing checkout.

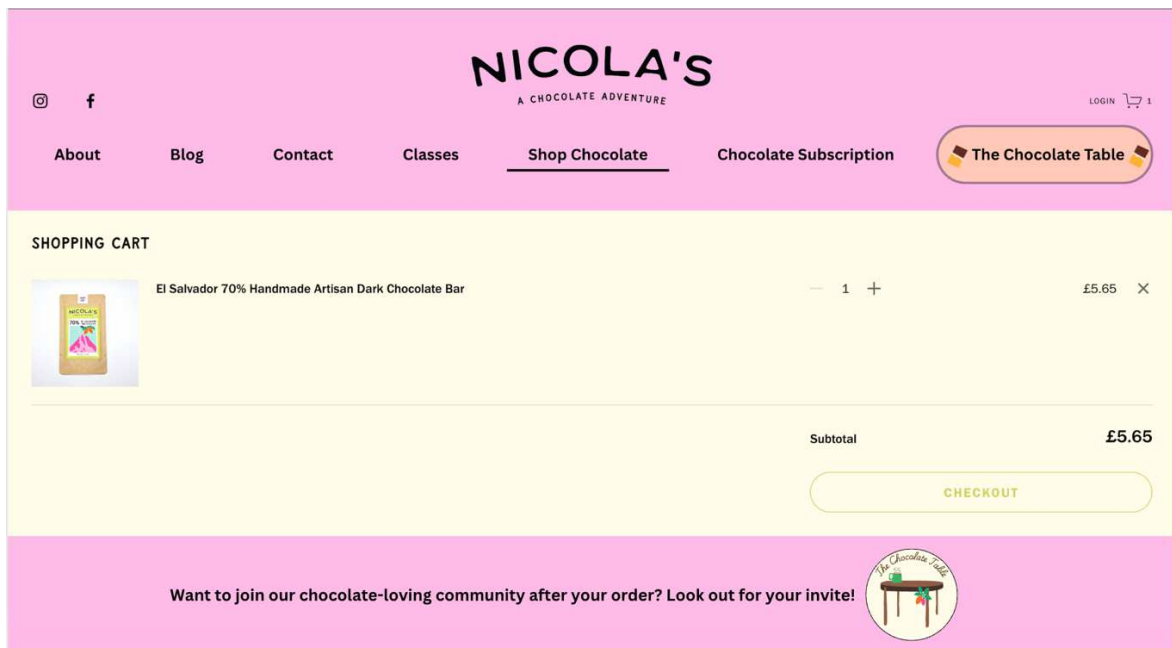

Figure 9 – Improved Checkout

This reflects the limited amount of promotion covered during the checkout process, so as not to overwhelm the customer. The subtle allusion to an invite refers to the main form of promotion for the forum.

D2C Delivery Moment:

- Use the unboxing moment as the key sign-up touchpoint.
- This post-purchase window is when brand affinity is highest, and it encourages emotional follow-through.
- Include a printed card or handwritten note

Sample Note:

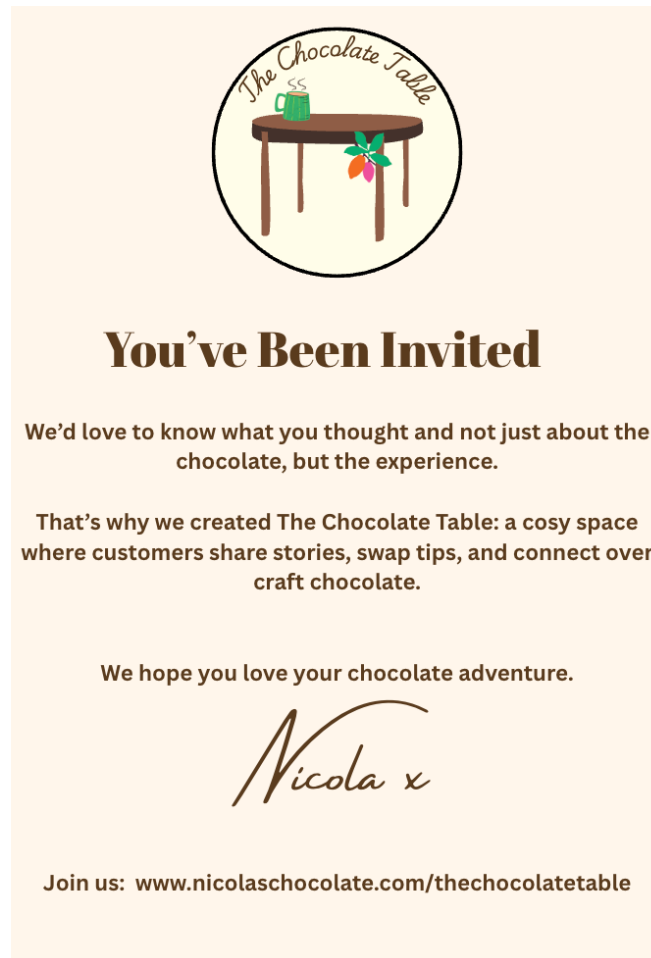

Figure 10 – Forum Invitation

By including this insert with online orders, Nicola invites customers to continue their journey beyond the product.

Key Metrics:

- Forum sign-ups
- Page views on the landing page of The Chocolate Table
- Referral traffic from the main website

Engage

Engage is the most important part of the RACE framework for the campaign. The goal here is to keep Nicola's brand present in users' lives through consistent, value-led touchpoints: The Chocolate Table, content, and in-person events will all play a central role in maintaining this connection.

Website & The Chocolate Table experience

Figure 11 – Logo

The logged-in view of The Chocolate Table reinforces everyday engagement through friendly UI, Nicola-led storytelling, and user-generated content. Events, polls, and shared experiences keep the space active and welcoming, turning passive buyers into brand advocates.

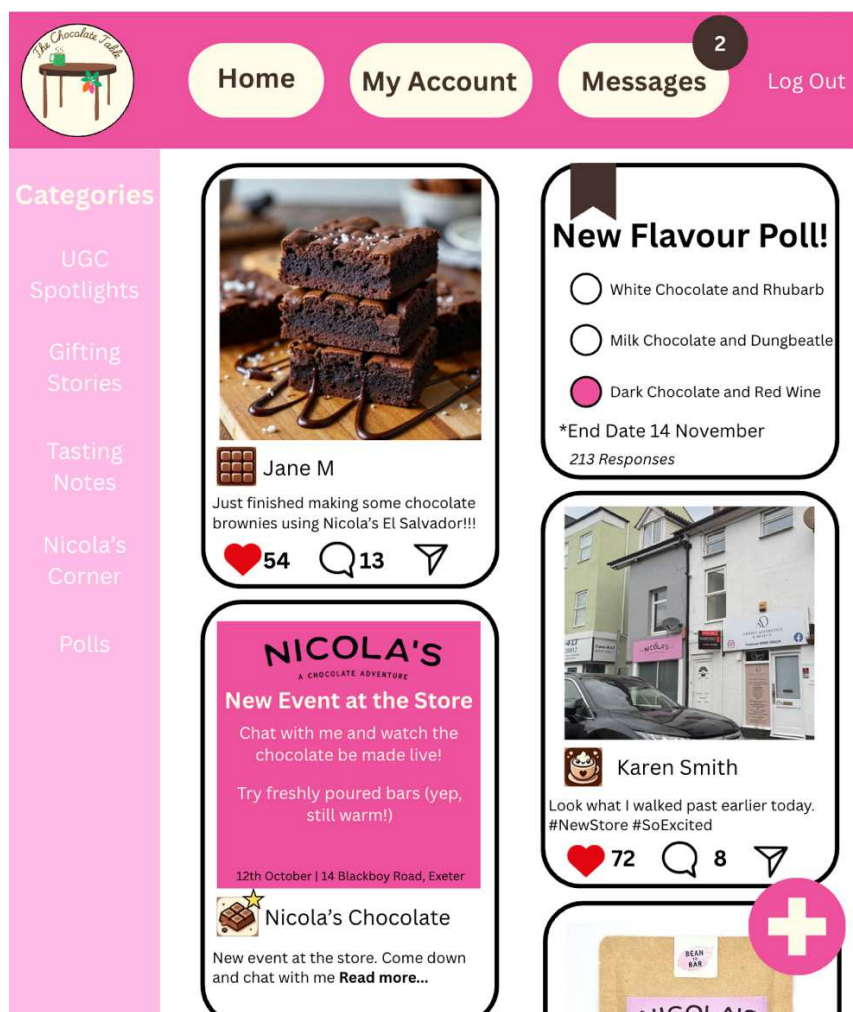

Figure 12- Webpage UX

Feature	Specific	Details
Home page	Welcome Feed	A collection of the most recent posts, posts can be bookmarked by Nicola and carried to the top
	Heading	“Home” button which takes people back to main feed; “My Account” lets people customize their account such as profile picture as well as access friends list; “Messages” allows for direct messaging and Nicola can also use it to notify the community.
	Floating Post Button	Large plus sign for quick posting; Makes participation easy and welcoming
Categories	UGC Spotlights	Allows consumers to see posts that have been highlighted by Nicola. Makes consumers feel recognised.
	Gifting Stories	Members can add subcategories to their post to give context. Picking Gifting Stories allows people to see posts that have been labelled as such.
	Tasting Notes	Same as Gifting Stories except for people experience with different bars. Appeals to Group 2 as it allows chocolate connoisseurs to engage with others of the same passion.
	Nicola’s Corner	Allows consumers to filter content to that produced specifically by Nicola. For those that want a more specific feed. Helps build founder connection and brand intimacy.
	Polls	Allows people to view current polls going on.
Post type	General	A regular post that anyone can make. Contains a picture, profile details like name, caption, likes, comments and shares. These features allows for a deep usage of the site and allows Nicola to track engagement.
	Polls	Can be created by Nicola. She can allow for community engagement. Gives users influence, boosts participation and makes the community stronger.
	Events	Allows Nicola to create posts highlighting events. Nicola’s posts are highlighted with a star so people know its authentic. Furthermore, posting events allows her to host things specific to the community.

Table 19 – Forum Features

Key Metrics:

- Active users per month
- New sign-ups

- Comment and like rates
- Average session duration

In-Person Events and UGC highlights

Events are a key source of deepening the bond between a brand and its consumer. In-person events create deeper emotional moments. These moments create memories, not just transactions, which increases the likelihood of repeat purchases, brand advocacy, and word-of-mouth recommendations. The reposting of UGC content is done to highlight those who are active participants with the brand. This encourages others to stay with the brand as well.

UGC highlights

- Repost community photos and stories from The Chocolate Table and Instagram to highlight real customer voices
- Feature a rotating “Customer of the Month” or “Nicola Recommends” post to spotlight forum members and their creations
- Encourage light-touch UGC with phrases like:
- “Tried something new? Share it on The Chocolate Table!”
- Build emotional resonance by tying product back to people, not just taste — especially through gifting stories and shared memories

Brick-and-Mortar Events

- Host in-store events where community members can:
 - Participate in chocolate-making workshops
 - Taste chocolate at its freshest
 - Meet Nicola in person
- Strengthens real-life community bonds formed online via The Chocolate Table
- As the brand scales nationally, it benefits the original local supporters who have easier access to the site.

Figure 13 – UGC and Events

Key Metrics:

- Engagement on reposted UGC
- #TheChocolateTable hashtag use
- Event attendance
- Repeat attendees

6. Action

6.1 Pre-Campaign Gantt Chart

This largely includes the set-up for the main campaign starting on October 1st 2025, and lasting till September 1st 2026.

Task	Description	When		
		Jul 25	Aug 25	Sep 25
Intern recruitment	Find a marketing student or recent grad to support forum moderation and campaign delivery. They should also be aware i that as a small business they may have to step into roles outside job description. Nicola should be selective in this process and start as soon as possible.			
Hiring a freelance web developer	Source a part-time developer to build and integrate <i>The Chocolate Table</i> onto the site. Nicola can use platforms such as: upwork.com, peopleperhour.com, and Fiverr Pro.			
Hire a designer	Hiring a temp designer to help with website assets will be important. Using the same designer that Nicola used in her rebrand could be helpful for uniformity but not necessary. They should work alongside the web developer.			
Forum platform testing	This can be done both by the Intern and the web developer to test usability. Stress testing the website from different usage points.			
Final content and email prep	Prepare launch-day blog post, email welcome series, and CTA graphics (Instagram + packaging). Start launching promotional content for “The Chocolate Table			

Table 20 – Pre-campaign Gantt Chart

6.2 Campaign Rollout Timeline: October 2025 – August 2026

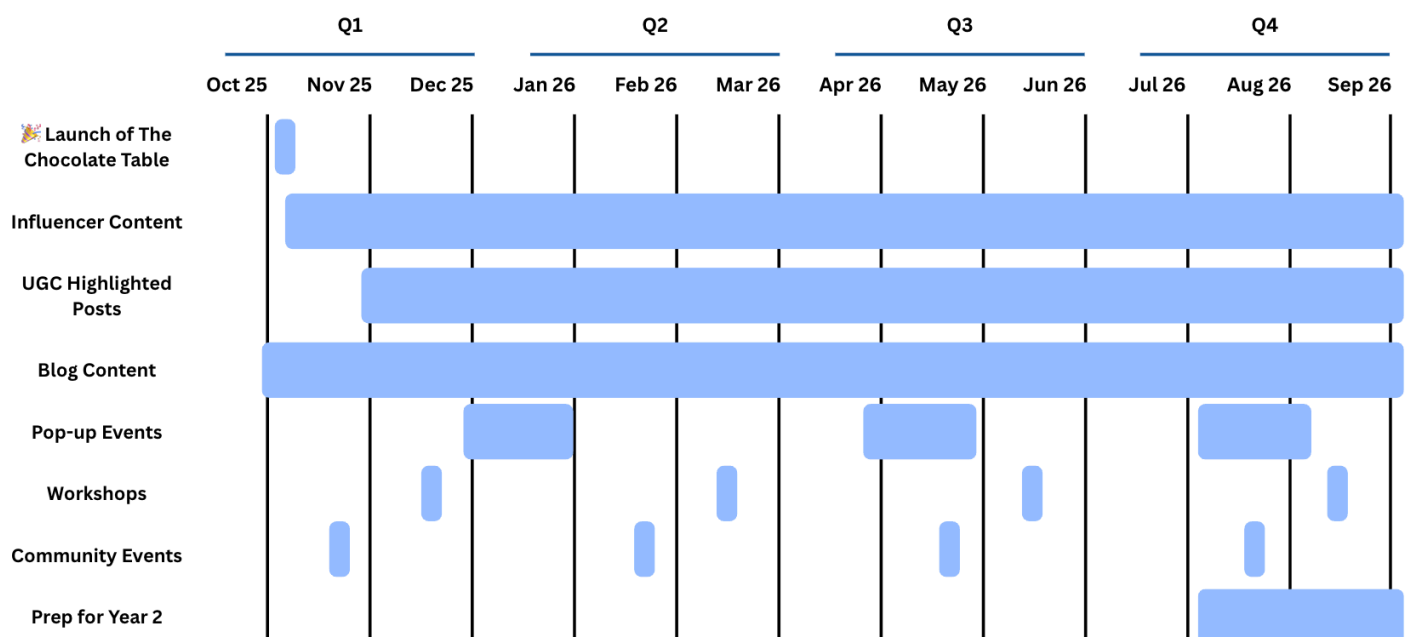

Figure 14- Timeline

Detail	Justification
Launch of the Chocolate Table	The campaign will start with the Launch of the Chocolate Table at the start of October. All the promotion will begin in September in the pre-campaign lead up.
Influencer Content	This will begin shortly after the launch of the forum. It builds awareness and supports forum momentum. It also helps with Reach by expanding to new audiences.
UGC Highlighted Posts	Timed so that it begins after the site opens. This allows the community to feel heard and builds reciprocity and deeper emotional connection with the brand.
Blog Content	This should begin with the campaign as the prep for the “creation of ‘The Chocolate Table’” blog will have been done in pre-campaign. Blogs will continue through the campaign year to continue Nicola’s storytelling USP.
Pop-up Events	With Nicola’s time being precious especially with the new campaign and forum. Pop-up events will be limited to around gift and holiday seasons. The timeline shows a pop-up for Christmas Markets, Easter markets and Summer markets. This allows for fair time between each pop up.
Workshops	Workshops are time consuming and so will be limited to once a quarter. They have also been spread to match slower retail months and off-peak seasons.

Community Events	Community events will be limited to once a quarter. Just enough to maintain brand presence and nurture loyalty without it being detrimental to production and other key aspects of running a business.
Prep for Year 2	End-of-campaign review. Nicola will evaluate what went well and what didn't have the same impact as expected. Gives Nicola 3 months to take feedback on board and prep for Year 2.

Table 21 – Timeline Justifications

6.3 Roles & Responsibilities

Role	Responsibility
Nicola	The central figure of the brand. Does most of the production as well as being in video content and storytelling posts. She also leads workshops, pop-ups and events.
Intern	There to help off-load some of the workload from Nicola. Especially useful in settings where it's not direct customer interaction. Tasks can include but not limited to, forum moderation, Selecting UGC to be highlighted on socials, blog scheduling and event support behind the scenes.
Alison (and other family/friends who help)	While not directly featured in the campaign, Nicola's family and friends often support day-to-day operations. Their informal role is important for easing Nicola's production workload, giving her more time to focus on campaign visibility and customer-facing activity.
Freelance Developer	The creation of "The Chocolate Table" in pre-campaign. As well as assisting on the back-end and bug fixing.
Freelance Designer	Create forum assets in the pre-campaign. Can also give advice on designs for Instagram, Blog and Forum posts.
Influencers	Their role is to increase brand awareness by showcasing Nicola's Chocolate to wider audiences. This will be especially pivotal in earlier months to raises awareness of "The Chocolate Table".

Table 22 - Roles

6.4 Budget

The budget has been split across three key areas: execution (team and delivery) and engagement tools (targeting Reach), and extra (random costs). Each cost has been

researched and aligned with Nicola's available marketing budget of £20,000, ensuring maximum impact while remaining realistic for a small business.

Item	Cost Estimate	Calculation	Justification
Intern (part-time)	£5200	12.50/hour x 8 hours x 52 weeks	£12.50 is slightly above minimum wage. 10 hours a week is probably all that is needed. Whilst the business is still small.
Freelance Web Developer	£4500	Initial Development: £3,000 upfront (makkpress, 2024). Ad Hoc: £75/hour x 20 hours (over 3 months of development) = £1500 (Sanchez, 2025).	Nicola so far has developed the website herself. However the forum is a step up in amount of skill needed so will need a more practiced helper. There's an upfront cost of £3000 for initial development with 20 hours of AD Hoc over the next 3 months.
Freelance Designer	£1200	UX/UI Designers: £350–£500/day on average for mid to senior-level (YunoJuno, 2025).	Hiring a UK freelance designer to create branded forum UI components (icons, layout mock-ups, button styles) for 2–3 days could cost ~£600–£1,200 depending on experience

Table 23 - Budget Breakdown 1

Item	Cost Estimate	Calculation	Justification
Influencer Partnerships (3 total)	£3000	Mixed comments with SHOUT paying £100/video for their service (SHOUT, 2024). “Nano-influencers (500–10,000 followers): \$10 to \$100 per post Micro-influencers (10,000–50,000 followers): \$100 to	Targeting small influencers but with audiences with values that overlap with the brands values can make money go further.

		\$500 per post” – Shopify (Hitchcock, 2025).	
Event Costs (Workshops/Pop-ups/Events)	£2750	Stalls at markets: £10-50/day or <£300/week (Bromley, 2022). Market Stall License: £75 depending on the council (CPD , 2025). Other smaller costs: Insurance: £50-100/event Equipment: £100 Travel: £30 Rough Total = £250 event	The timeline shows 11 events that will take place over the campaign. Each event will have varying costs with her appearance at market roughly averaging to £305 per visit. However events that are hosted at her new shop will have lower costs which lowers the average total to roughly £250 an event.

Table 24 - Budget Breakdown 2

Item	Cost Estimate	Calculation	Justification
Camera Upgrade	£1100	Canon EOS R8; can record 4k at up to 40fps.	While only a small thing and a phone might be able to accomplish similar results. The camera will add an elevated vibe to content produced for Nicola's Chocolate.
Contingency fund	£2250		If anything may be more expensive than expected the contingency fund can provide a bit of leeway.
Total	£20,000		

Table 25 - Budget Breakdown 3

*Pricing based on current estimates (2024–2025). Subject to supplier availability and market rates.

7. Control

7.1 KPIS & Measurement

KPIs have been selected to align directly with the campaign objectives and their corresponding RACE stages, ensuring each tactic is performance-tracked with relevant, actionable metrics. For more granular, strategy-specific metrics (e.g. pop-ups or workshops), refer to the Key Metrics outlined in the Channel Distribution section.

Objective	RACE Stage(s)	Core KPI's	Measurement Tools	Review Frequency
1. Increase Brand Awareness Nationwide	Reach	- Impressions & reach (socials) - Influencer content views - Growth in followers (IG/Facebook) - % of new visitors to website	Meta Business Suite, Influencer Analytics, Google Analytics	Monthly
2. Grow and Engage Nicola's Chocolate Community	Act / Convert/ Engage	- Forum sign-ups - number of active members - UGC posts and replies	Forum analytics, manual UGC tracking	Monthly
3. Improve Website Traffic and Engagement	Act	- Organic Traffic Growth (%) - Bounce Rate - Time on Site - CTA CTR	Google Analytics, SEO tools	Quarterly

Table 26 - Marketing Objectives

Objective	RACE Stage(s)	Core KPI's	Measurement Tools	Review Frequency
4. Increase Revenue Fourfold	Convert, Engage	- Total revenue growth (monthly/annual) - Average Order Value (AOV) - Repeat purchase rate - Checkout conversion rate - Promo code redemption rate	E-commerce dashboard, CRM platform Google Analytics, Forum engagement stats	Monthly
5. Expand Retail Distribution	Reach	- New stockists acquisition - Retailer reorder rate	Sales CRM, Retailer feedback forms,	Quarterly

			Retailer outreach log	
--	--	--	-----------------------	--

Table 27 - Financial Objectives

7.2 Financial Evaluation

Nicola’s Chocolate currently earns around £25,000 annually. This campaign marks her first structured investment in digital marketing, supported by a £20,000 budget. Given her small revenue base, even modest growth could yield impressive percentage gains — a classic example of the low base effect (Kurian, 2025).

Return On Investment

Scenario	Estimated Revenue (Total)	ROI (%)
Conservative	£80,000	300%
Realistic	£100,000	400%
Optimistic	£140,000	600%

Table 28 - ROI Table (based on £20,000 budget)

These projections reflect strong growth potential in an expanding premium chocolate market with a CAGR of 11.70% (Statista, 2025a).

Break-even Analysis

The average Nicola chocolate bar is priced at £5.65
Break-even revenue is £20,000

Calculation:

$$£20,000 \div (£5.65 - £2.50) = 6,349 \text{ bars}$$

Selling 6,349 bars (≈530 bars/month) covers the £20,000 budget. Achievable with the planned campaign

Risk And Mitigation

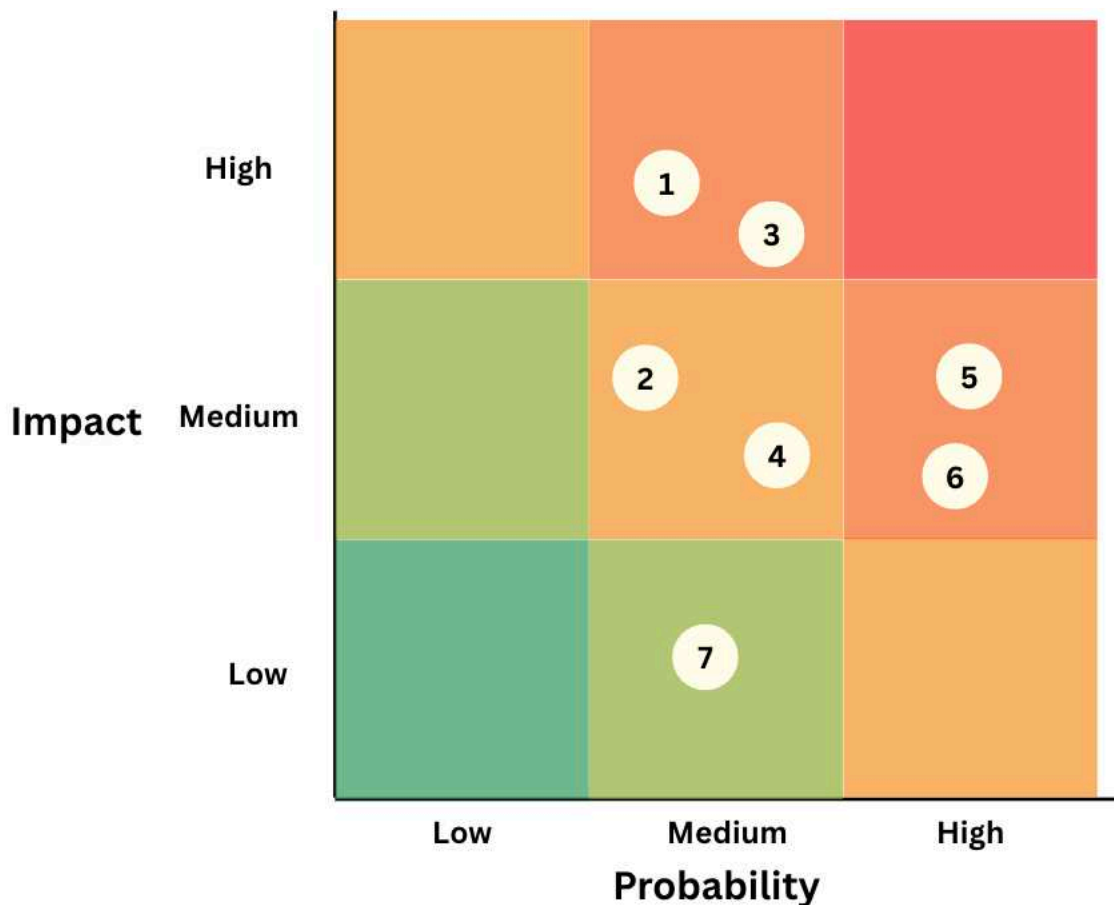

Figure 15 - Risk Heat Map

Risk #	Risk Description	Justification
1	Forum stagnation	Theres a chance especially initially that the forum might struggle to gain enough traction.
2	Influencer underperformance	Influencer reach is variable and outcome depends on targeting quality.
3	Low website conversion	High impact on revenue growth if engagement doesn't convert.
4	Retailer outreach fails	Theres always a chance that retailers might not support Nicola's Chocolate however the campaign isn't reliant on it. But it could hinder total revenue.
5	Nicola overwhelmed	Nicola is everything to the business and the business itself is scaling massively during the campaign. The new intern will help but Nicola is still doing most of the work.

6	Cocoa cost increase	The probability is high with changing climates causing cocoa bean growth to be inconsistent. But Nicola's bars are so transparent in their production that most her customers won't mind if bar prices increase.
7	Setup costs exceed Budget	Medium chance of unforeseen tech/production expenses, but low impact due to your 11.25% contingency fund built into the £20,000 budget.

Table 29 - Risk Justification

8. Long-term Recommendations

Table 30 - Long-term Ansoff Matrix

Following the campaign, and depending on its success, Nicola should start considering broader growth strategies. Largely with the expected revenue growth, Nicola can afford to develop a more costly campaign. Looking at the Ansoff matrix, she could consider any of the other routes for growth.

Product development looks at new products for existing customers. Here, the launch of seasonal bars, especially if it's done in collaboration with the community, could result in higher engagement. She could also create a brand new product, like coffee. While the chocolate pairing kits rely on Nicola's expertise as a chocolate taster and support her community of chocolate connoisseurs, providing a unique experience when trying her food.

Market development refers to the same product being introduced into a new market. Nicola's products already have demand elsewhere, especially among chocolate connoisseurs. The key with this strategy is to expand without compromising Nicola's product quality or her existing community.

Diversification looks at new products in new markets. The strategy suggested could be titled "Nicola's Notebook" and leverages the strongest part of the brand – Nicola herself. This idea tries to boost Nicola as a central figure, which would result in the brand's performance improving as well.

9. Conclusion

This campaign aims to grow Nicola's Chocolate into a leading artisan brand in the South West. With a £20,000 budget, the plan projects a 400% increase in revenue by leveraging Nicola's existing strengths: ethical storytelling, content-led marketing, and community-driven values. At the heart of the strategy is "*The Chocolate Table*", a digital space designed to nurture customer engagement and brand loyalty as the business expands beyond Devon. The expected outcomes include significantly increased revenue, greater geographic reach, and stronger customer relationships. This campaign aims to grow Nicola's Chocolate into a strong brand, ready for future expansion built on these foundations.
